

Feedback Control of Dynamic Systems, 9e

By Powell, Emami-Naeini, Ivler

1. When “Table of Contents” (under “Front Matter” is clicked in the left-hand side Table of Contents, a full-page TOC shows up with **Contents** at the top, and the next item listed is **Preface**, followed by several indented items including **Preface** again. The First instance of **Preface**, should say **Front Matter**, in order to match the TOC on the left side.
2. TOC 5.5.1: “Contol” should be “Control”. (occurs in the left-side TOC and the full-page TOC)
3. TOC 6.4.1: “Stablity” should be “Stability”. (error only occurs in the full-page TOC)
4. TOC 8.4: Full-page TOC should include (W) at end (e.g. see 2.4
5. TOC 8.7: Full-page TOC should include (W) at end
6. Chapter 3, Section 3.1.7, example 3.16 Matlab code
Highlighted number should read 108 not 27

```
Theta = ((27*s) / (s^3 + 5.36)) * (0.25 / (s+1.75))
[Theta1,t] = impulse(Theta,6);
Theta2 = -5.143 * t. * exp (-1.75*t) + ...
          3.39 * exp (0.875 * t). * sin (1.516 * t)
plot(t,Theta1*180/pi,'b',t,Theta2*180/pi,'r--')
```
7. The signs on the real part of the complex roots in Step 7 in Section 8.3.1 (just prior to Figure 8.39) should be negative, I.e., it should read:
 $pc = [-0.0051; -0.468; -0.279+0.628*j; -0.279-0.628*j; -1.106; -9.89]$.
- 8.
